

Sentry GUARD

URBAN

The Sentry Guard is a highly versatile, cost-effective alternative to traditional man-guarding. You can use it in a variety of locations to provide highly sensitive intruder detection.

Easily portable and totally reliable Sentry Guard is a perfect adjunct to your existing security systems.

- Intelligent microprocessor-controlled Passive InfraRed detection
- Patented environmental housing for optimal weather performance in all weather conditions
- Wide flexible base for maximum stability in windy conditions
- High impact fibreglass construction
- InfraRed curtain starts at the base of the unit ensuring no invisible creep zones
- Height of 1.3 metres and weight of just 18 kilogrammes makes it very easily portable
- Tested by the military to guarantee detection on crawl, slow walk, walk and run
- Available with two 60 m detectors back-to-back the unit provides 120 metres of curtain coverage for motion detection
- Detection levels can be adjusted to avoid triggering by cats, foxes etc.

Sentry ELECTRONICS

There's no place we can't guard
