

Sentry SCOUT ARCTIC

The Sentry Scout Arctic has been specifically designed to provide a highly effective security presence in hostile polar environments. Temperature variations can be very large in arctic conditions and the Scout will work equally efficiently in severe cold, its working range is down to -40°C . Its sturdy construction will also keep it operating during windy conditions. Designed primarily to support Arctic Warfare.

It is specifically camouflaged for maximum concealment.

- High spec PIR technology
- Alarm sent via radio link to monitoring agency situated remotely
- Detection range of 60m
- Releases valuable security personnel for other duties
- Variable battery technology enables unit to be used in all different weather conditions

SPECIFICATION

Height (folded) 77cm	Leg width (deployed) 74cm
Height (deployed) 114cm	Width (legs folded) 23cm
Body width 12cm	Weight 20kg
